Forecast for Wednesday 24 Jul 2024

Weather: Early morning mist and fog will affect some ranges but soon lifting and clearing with sunny spells developing for most areas. Clouding over from the west during the afternoon with some lower cloud forming on the western summits by early evening, perhaps some drizzly showers developing here too. Further showers later in the evening, especially in the west, but these moving through quite quickly on the strengthening southerly winds.

Chance of cloud-free hill tops above 800m: 90% falling to 70% by early evening as frontal cloud and rain approaches from the west later in the day.

Low cloud and visibility: Patches of low cloud above 600m in the morning however these will mostly lift and clear with very little cloud affecting summits for most of the day and very good visibility for all areas. During the afternoon cloud will develop from the west but it will not be until late afternoon until summits become affected, few or scattered cloud above 700m by early evening. Visibility remaining good until rain showers when it may become moderate later.

Met Office Aberdeen Meteorologist's View
Strengthening southerly winds with a few strong gusts later in the evening. Feeling quite warm during the morning with some strong sunshine likely.

Forecast for Thursday 25 Jul 2024

Weather: A dry start with some bright or sunny spells in the east, some cloud on western ranges like Ben Alder, possibly some drizzle here at first too. It is likely to become cloudier in the afternoon with the risk of some showers, a few of these will be heavy with the risk of thunder but these should move through quickly with brisk southwesterly winds. Showers continuing during the evening.

Maximum wind: Southwesterly 15 mph gusts 25 mph.

Chance of cloud-free hill tops above 800m: 90% falling to 70% by mid afternoon as showers develop.

Low cloud and visibility: Most summits will be clear in the morning with good visibility, further west scattered cloud is possible above 700m and visibility may be moderate or poor in any drizzle. During the afternoon as showers develop cloud will thicken with periods of scattered or broken cloud above 600m in heavier showers and visibility turning moderate for a time.

Temperature: **Glens:** Plus 13 rising to 18 Celsius.
At 800m: Plus 9 Celsius.
Freezing level: Above all summits
